EDUCATION

Modern Institute of Technology & Research Centre (MITRC)

Bachelor of Technology in Computer Science and Engineering

Alwar, Rajasthan

2023 – 2027

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, PostgreSQL, Prisma ORM

Developer Tools: Git, GitHub, Postman, Turborepo, Vercel, Render

Concepts: Authentication, Authorization, API Design, Responsive Design, WebSockets, WebRTC

PROJECTS

CEX (Centralized Cryptocurrency Exchange) | *React, TypeScript, Node.js, Express.js, Redis, PostgreSQL, WebSockets*

- Built a production-ready full-stack cryptocurrency exchange with secure authentication, wallet management, real-time market data, and a responsive trading terminal.
- Designed a high-performance matching engine using in-memory order books, event-driven architecture, and Redis communication for low-latency trade execution.
- Implemented REST APIs, WebSocket-based live market updates, candlestick charts, order books, trade history, portfolio management, and a scalable TypeScript monorepo architecture.

• **GitHub:** github.com/Lkshayyadav/CEX

Live: cex-frontend-gamma.vercel.app

JobTrack | *React, TypeScript, Node.js, Express.js, MongoDB, TanStack Query, Tailwind CSS*

- Built a production-ready full-stack SaaS job application tracker with Kanban and table views, drag-and-drop workflow management, and multi-user support.
- Implemented JWT authentication, role-based access control, RESTful APIs, CRUD operations, recruiter management, follow-up reminders, dashboard analytics, advanced search/filtering, and CSV/JSON import-export.
- Developed a responsive frontend using React, TypeScript, TanStack Query, Axios, reusable UI components, and optimized state management for a seamless user experience.

• **GitHub:** github.com/Lkshayyadav/JOB-TRACKER

Live: job-tracker-eight-neon.vercel.app

Second Brain | *React, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS*

- Developed a production-ready full-stack knowledge management platform for organizing YouTube videos, GitHub repositories, articles, PDFs, notes, images, and other digital resources.
- Implemented JWT authentication, bcrypt password hashing, protected routes, Zod validation, RESTful APIs, and complete CRUD functionality with advanced search/filtering and JSON import-export.
- Designed a responsive dashboard with reusable React components, Collections, Tags, Favorites, Reading Status, and an optimized user experience.

• **GitHub:** github.com/Lkshayyadav/Second-brain

Live: second-brain-hazel-nu.vercel.app

ElevateAI | *React.js, Node.js, Express.js, MongoDB, Gemini AI*

- Built an AI-powered interview preparation platform with resume analysis, personalized feedback, and AI-generated interview practice using Gemini AI.

• **GitHub:** github.com/Lkshayyadav/ElevateAI

Live: elevate-ai-zeta.vercel.app

CERTIFICATIONS & LEARNING

- 100xDevs Cohort — Full Stack Development by Harkirat Singh
- Full Stack Development Course — Modern Institute of Technology & Research Centre
- Continuously learning modern backend architecture, scalable web applications, and open-source development through hands-on projects.
